

# Can You Hear Me Now...

*"If Harvey still needed one of these after September 1895, we'd all be doing something very different..."*

Did you know the first adjustment ever given wasn't for back pain, neck pain or headaches? Here's how it all started as told by our founder Dr. D.D. Palmer...

*"Harvey Lillard, a janitor, in the Ryan Block, where I had my office, had been so deaf for 17 years that he could not hear the racket of a wagon on the street or the ticking of a watch. I made inquiry as to the cause of his deafness and was informed that when he was exerting himself in a cramped, stooping position, he felt something give way in his back and immediately became deaf.*

*An examination showed a vertebra racked from its normal position. I reasoned that if that vertebra was replaced, the man's hearing should be restored. With this object in view, a half-hour's talk persuaded Mr. Lillard to allow me to replace it. I racked it into position by using the spinous process as a lever and soon the man could hear as before.*

*There was nothing 'accidental' about this, as it was accomplished with an object in view, and the result expected was obtained. There was nothing 'crude' about this adjustment; it was specific, so much so that no Chiropractor has equaled it." Thus Chiropractic was born!*

Now imagine if Harvey's hearing didn't come back... you might be getting prepped for surgery right now! Thank God D.D. was a good persuader. Until next time...
